		⁴ B	U	R	N			
					⁵ G	A	S	
⁶ C	L	I	M	A	T	E		

3 Possible answers:

- 1 Firemen are putting out a forest fire. Forest fires are an effect of climate change. Changes to rain patterns can cause forests to become very dry, and this can increase the risk of fire.
- 2 A man is cutting down a tree. Deforestation is a cause of climate change. When we cut down trees, a lot of carbon dioxide goes back into the atmosphere.
- 3 A ship is sailing through melting ice. Melting ice is an effect of climate change. The warming of the Earth is causing the Arctic sea ice to melt.
- 4 Men are working to find fossil fuels. Burning fossil fuels is a cause of climate change. Every year, people put about 40 billion tonnes of carbon dioxide into the Earth's atmosphere.

4 1 d 2 c 3 a 4 b
