

**1a** Look at the picture of the two penguins. Label their bodies. Choose the correct words from the box.

back    bill    breast    chick    down    flippers    ice    neck    tail

**1b** Put the words in the correct place on the diagram.

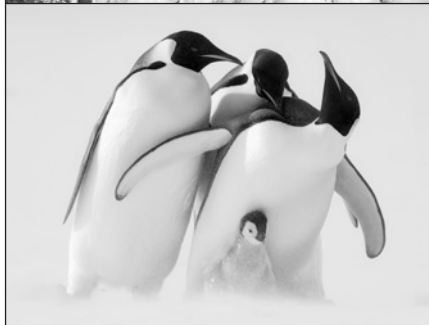

bill                      feathers                      flippers                      grey down                      large body  
 little feet                      small body                      white and yellow breast and neck

2 Look at the pictures. What are these penguins doing? Write a sentence about each picture.

What are the penguins doing?

3 Write about life in a huddle. Why do penguins make a huddle? How do birds move in the huddle? What happens on very windy days? What does a huddle need?

4 Complete the timeline of the year with the information in the box.

Again and again, the male and then the female go to the sea for food.  
It is summer. The chick can leave its parents and start a new life.  
The chick is bigger. It lives on the ice and not on its parents' feet. The male and the female can go to the sea together and bring back more fish.  
The female comes back from the sea. Slowly, a little grey chick hatches out of the egg.  
The female gives it food.  
The male courts the female, and they mate.  
There is no sun for eight weeks. The female lays her egg and then goes to the sea for food.  
The male keeps the egg warm on his feet.
