## ARTIFICIAL INTELLIGENCE

## WORKSHEET ANSWER KEY LEVEL

- **1** 1 a 2 a 3 b 4 c 5 b 6 c
- 2 1 Alan Turning; computer
  - 2 John McCarthy; field of AI
  - 3 Arthur Samuel; checkers
  - 4 Rodney Brooks; behavioural AI
  - 5 IBM; chess
  - 6 Frank Rosenblatt; perceptron model
  - 7 DeepMind; Atari video games
  - 8 Thomas Nagel; consciousness
- 3 1 knowledge-based AI
  - 2 logic-based AI
  - 3 behavioural AI
  - 4 weak AI
  - 5 strong AI
  - 6 general AI
  - 7 symbolic AI
- 4a a post
- **b** smaller ring
- c ring
- 4b 1 initial
- 2 transforms
- 3 new
- 4 goal
- **5** process
- 6 states
- **5 1** control
- **2** reactive
- **3** avoiding
- 4 planning
- 5 modelling
- **6** follow
- 6a Model answers:
  - 1 A chatbot is a program that attempts to talk to users, usually on social media and often using little more than conversations built on keywords.
  - **2** A software agent is part of a computer environment that works with us to do everyday tasks on personal computers and on the internet.
